Its rotary motion gives accelerated velocity o its cutters, enabling it to cut smooth and easy. The fit ger racks being connected by a hinge, allows it to adjust itself to uneven surfaces; it is without side-draft, and entirely free from clogging; it requires less power and less managing; it can run slow or fast, around a corner or on a straight line. The cutters are well guarded from stones, and can be set instantly for high or low grass. It is constructed entirely of iron. Persons are invited to call and exam ne be
